

FUND PLATFORM PROPOSAL

Whiskey Fund Platform Proposal

A proposed platform solution for the establishment and management of a dedicated whiskey investment vehicle for **Malcolm De Silva** and **The Whiskey Mansion**.

PREPARED FOR

**Malcolm De Silva
The Whiskey Mansion**

PREPARED BY

YMC Capital Limited

PROPOSAL TYPE

**Platform establishment &
investment management**

STRUCTURE BASIS

**Dedicated fund platform /
segregated portfolio model**

This proposal sets out how YMC Capital can provide a turnkey fund platform for a whiskey-focused investment strategy, including structuring, launch coordination, service-provider management, governance, and ongoing investment management support.

1. OPPORTUNITY

A dedicated platform for collectible whiskey exposure

YMC Capital proposes to establish a dedicated investment structure designed to acquire, hold, manage, and ultimately monetize a curated portfolio of whiskey-related assets.

The platform can be tailored around rare bottles, cask interests, inventory financing, special release allocations, and other collectible or specialty whiskey exposures, subject to final investment policy, legal workability, valuation methodology, and custody logistics.

Rather than building a fund architecture from scratch, Malcolm De Silva and The Whiskey Mansion can leverage YMC Capital's existing platform capability to accelerate launch, streamline governance, and implement a more institutional operating framework from day one.

Why this structure works

It combines specialist sourcing and domain knowledge with an institutional wrapper suitable for investor onboarding, oversight, and controlled execution.

Where YMC adds value

YMC provides the platform, legal and operational coordination, fund design discipline, and ongoing management infrastructure.

Commercial flexibility

The final vehicle can be configured around a private mandate, a small club format, or a broader investor-facing fund.

Institutional readiness

Service providers, reporting, controls, and investor processes can be built in from inception rather than patched together later.

Indicative platform objectives

- Establish a clean legal and operating structure for a whiskey strategy.
- Create a vehicle capable of holding alternative, collectible, or specialty inventory exposures.
- Implement clear roles between sourcing expertise and fund oversight.
- Support future investor participation if desired.
- Preserve optionality for scale, reporting, and governance.

RARE BOTTLES

CASKS

INVENTORY

SPECIAL RELEASES

COLLECTOR ASSETS

2. STRUCTURE & SCOPE

Proposed operating model

At a high level, YMC Capital would facilitate the establishment of a dedicated whiskey fund vehicle on its platform, coordinate launch with relevant service providers, and act in the agreed management capacity once the structure is live. The final scope would be documented in the definitive legal agreements.

AREA	YMC CAPITAL ROLE	CLIENT / STRATEGY ROLE
Fund formation	Coordinate structure design, legal setup process, service-provider onboarding, launch workstreams, and implementation sequencing.	Confirm commercial objectives, investor profile, preferred holding model, and asset strategy parameters.
Investment mandate	Translate the proposed whiskey strategy into an institutional mandate, approval framework, and operating procedures.	Provide asset expertise, sourcing thesis, acquisition logic, and market access.
Execution governance	Establish approval mechanics, trade / acquisition controls, record-keeping expectations, and reporting cadence.	Source opportunities and support diligence on bottles, casks, counterparties, and exit routes.
Ongoing management	Provide platform oversight, manager coordination, investor-facing process discipline, and administrative interface with service providers.	Support ongoing portfolio intelligence, pricing context, collection management insight, and disposition strategy.

Structure optionality

Dedicated segregated portfolio under an existing platform or other tailored structure depending on investor, tax, and regulatory requirements.

Control framework

Approval rights, investment committee mechanics, valuation policy, and asset custody procedures to be customized.

Service-provider layer

Administrator, legal counsel, auditor, custodian / warehouse / records support, and other vendors selected to suit the final model.

3. ECONOMICS

Indicative commercial terms

The commercial framework below is intended as a clean starting point for discussion. It follows the same platform logic used in prior YMC mandates, while adapting the investment strategy to a whiskey-focused vehicle.

SET-UP FEE US\$25K One-time fee for structuring, launch coordination, legal / regulatory workstream management, and initial platform implementation.	MANAGEMENT FEE 1.0% Indicative annual fee on NAV for platform oversight, investment management coordination, and ongoing administrative interface.	PERFORMANCE FEE TBD To be agreed once benchmark, liquidity profile, valuation method, and allocation of sourcing economics are finalized.
---	---	--

ITEM	INDICATIVE POSITION
Fund expenses	Third-party costs such as administrator, legal counsel, audit, valuation, warehousing / custody, insurance, and related operating costs would typically be borne by the fund vehicle.
Manager scope	The management role can be structured as discretionary, semi-discretionary, or approval-based depending on how Malcolm De Silva and The Whiskey Mansion want execution authority to work.
Investor economics	Share classes, founder economics, lock-ups, redemptions, and hurdle / carry mechanics would be finalized in the definitive offering documents.
Commercial note	The model can accommodate a strategic operating partner role for The Whiskey Mansion if sourcing, warehousing, curation, or market access form part of the core value proposition.

4. IMPLEMENTATION

Indicative launch path

Assuming commercial alignment and prompt information flow, YMC Capital would expect the launch process to move through the following phases.

1

Mandate design

Agree investment scope, control model, target investor base, vehicle format, and core economics.

2

Structure build

Engage counsel, administrator, and other providers; prepare fund architecture and launch documents.

3

Operating framework

Finalize valuation, custody / storage, acquisition approvals, reporting lines, and investor onboarding process.

4

Launch

Open the vehicle, activate subscriptions or capital commitments, and begin controlled deployment into the strategy.

What we would need next

- Initial strategy note for the whiskey thesis
- Preferred investor profile and capital target
- View on bottles vs casks vs broader inventory exposure
- Preferred role of The Whiskey Mansion in sourcing / operations
- Commercial view on management and performance economics

What YMC would deliver

- Refined structure recommendation
- Proposed responsibilities matrix
- Indicative launch budget and provider map
- Draft engagement terms
- Path from concept note to executable fund platform

Important: This document is an indicative commercial proposal only. It is not intended to be a final engagement letter, fund document, legal opinion, or regulatory advice. Final terms would be set out in definitive agreements following further discussions on structure, strategy, economics, investor profile, custody, valuation, tax, and applicable law.
